

Data type & Variables

Lua Programming in Roblox

Variable

$X = 5$

↓ ↓

Variable Value / data

data type

Number

Data type

name

=

"owen xevb"

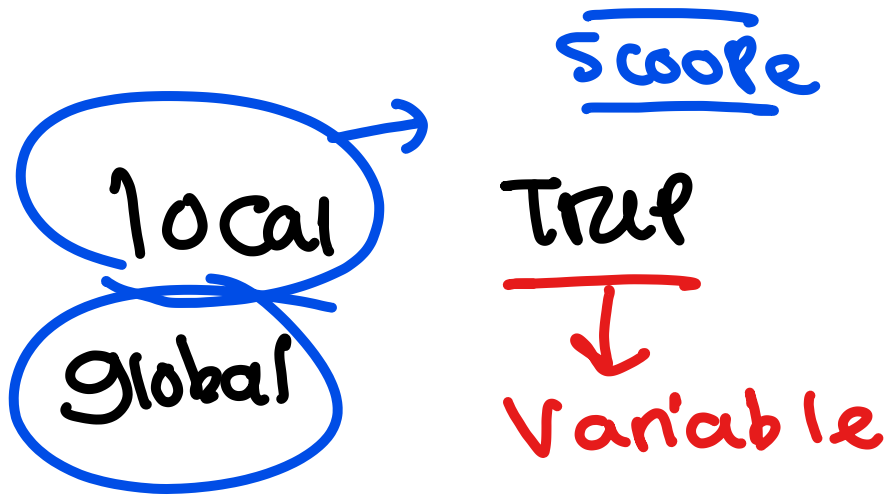

→ String

↓

o, w, e, n , x , e , v , i , o

↓

alphabet → character

Scope
True
↓
Variable

Scope Variable < local
global

Object

* Local

property / atribut → Variable

Method → Tingkah laku / behaviour

instancian'on → Person {
Name = owen

}

Person f
local name :
}

Object Person {
 Atribut : Name, Age, Height, Weight
 Method: Walking(), Jump(), Running()
}

Abstraction

* Design Object

Car

Blender

- Car has features :

- 1) Warna Mobil
- 2) Merk Mobil
- 3) Width
- 4) Height
- 5) Picture

attribute

```
Method Object Game {  
  - Display  
  - Destroy
```

```
function object_name.methodname(parameter)  
  ... your code / algorithm here
```

Multi-nomial Distribution

$$* P(A) = \dots \frac{n(A)}{n(S)}$$

$$P(A, N) = \dots P(A)^N$$

Binomial
↳ terjadi / n' data

Constructor

Object oriented Programming

Main Terrain

car adalah Child of Terrain

Parent of car is Terrain

Rumah

Ukuran Jendela

decomposition

house

has

a

Window -

Door

Car = {brand = "", color = "", owner = ""}

Honda ← Black ← Owen

```
function NewCar(brand, color, owner)
  Car.brand = brand
  Car.color = color
  Car.owner = owner
  return Car
end
```

```
function Car.startEngine()
  print(Car.owner, "Car engine is starting")
end
```

Supra = NewCar("Toyota", "Red", "Abdan") -- instanciate Supra Car Object

NSX = NewCar("Honda", "Black", "Owen")

Supra.startEngine() → Owen

NSX.startEngine() → Owen

Merhaba
