Total iterasi \rightarrow N s/d 1

The diagram illustrates the division of a number N by 2 repeatedly until it reaches 1. The process is shown as a series of divisions: $N / 2 / 2 / 2 / \dots / 2 \rightarrow 1$. A wavy line labeled "sebanyak" (as many) points from the first division to the last division, which is labeled x (jumlah iterasi), indicating the total number of iterations required.
